$$(12) \quad 1 = 1 \quad , \quad \text{by algebraic simplifications}$$

---

Q.E.D.

NDG conditions are:

$S_{BPA} \neq S_{CPA}$  i.e., lines  $BC$  and  $PA$  are not parallel (construction based assumption)

$S_{APB} \neq S_{CPB}$  i.e., lines  $AC$  and  $PB$  are not parallel (construction based assumption)

$S_{APC} \neq S_{BPC}$  i.e., lines  $AB$  and  $PC$  are not parallel (construction based assumption)

$P_{FBB} \neq 0$  i.e., points  $F$  and  $B$  are not identical (conjecture based assumption)

$P_{DCD} \neq 0$  i.e., points  $D$  and  $C$  are not identical (conjecture based assumption)

$P_{EAE} \neq 0$  i.e., points  $E$  and  $A$  are not identical (conjecture based assumption)
